INDUSTRIAL COLD ROOMS

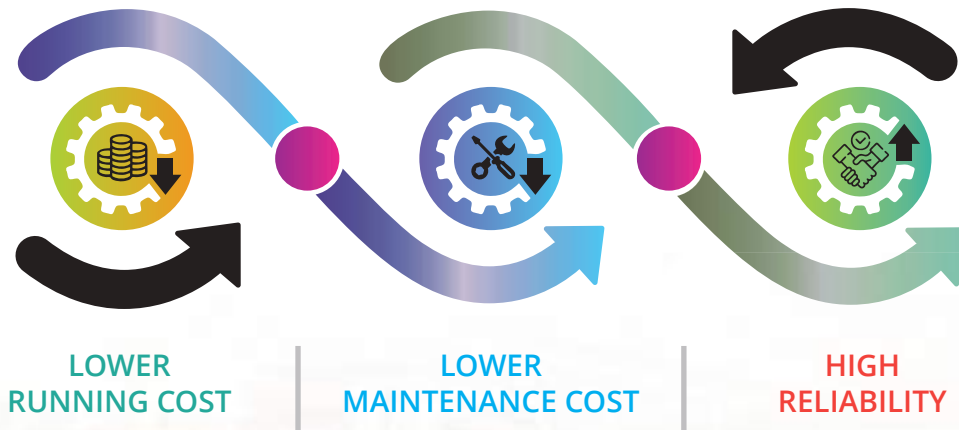

An Industrial Cold Rooms is used on large industrial level or big food storage units as it has a very enormous capacity and can store huge stocks of food. Industrial cold rooms (cold warehouse) can be constructed using a variety of insulation materials to suit temperature and fire resistant requirements. Cold stores can be built to virtually any size and specification to provide a safe environment for all storage.

CENTRALIZED REFRIGERATION SYSTEM

Centralized refrigeration plants makes it easy to coordinate your cooling or freezing requirements from a single location. It helps minimize power consumption, and allows easy management of equipment and service. Our Centralized Systems have been serving many industry giants to keep needs for processing seafood, poultry or meat products, beverages or large cold-storage warehousing facilities. Our Centralized Refrigeration Systems may also include dedicated control packages that orchestrates your cooling needs from a central location with a variety of natural and low-GWP refrigerants.

ADVANTAGES

SUPERMARKET

The demand for fresh and frozen food in a supermarket is increasing and one of the most important aspects is the 'display of products', refrigerated cabinets are extremely effective in simplifying this process.

HIMALAYA provides complete value added solution for super and hyper markets projects & we have solution for any scale of projects you might have and we follow best practices for plant maintenance with updated SFDA regulations.

SERVICE & MAINTENANCE

Preventive Maintenance

Where equipment is maintained before break down occurs. This type of maintenance has many different variations and is subject of various researches to determine best and most efficient way to maintain equipment. Recent studies have shown that Preventive maintenance is effective in preventing age related failures of the equipment. For random failure patterns which amount to 80% of the failure patterns, condition monitoring proves to be effective.

ANNUAL MAINTENANCE CONTRACT

HIMALAYA offers monthly, Quarterly and Annual maintenance Contract. As such, the following aspects are covered.

- Attend to any repairs, which may be necessary to ensure continuous operation.
- Advise client of any improvements that will
- Enhance the reliability and life of the equipment.
- Consumables for continuous operation of cold room.
- Routine scheduled visits.
- All labour charges included in the contract to carry out the services.
- 24-hour Emergency service as necessary.
- Spare parts at an additional cost.

Corrective Maintenance

Where equipment is maintained after break down. This maintenance is often most expensive, because worn equipment can the damage other parts and cause multiple damage. AMCO cooltech with it's vast experience and skills in cold stores offers preventive maintenance to avoid all failures, unnecessary equipment downtime & losses.
