Brands We Stock

PARTS SUPPLY

With a long established offering to the hydraulics parts supply market, our experienced and dedicated sales team are well-equipped to assist you with identifying your hydraulic part and its purpose. Confidently offering a direct replacement or suitable alternative solution.

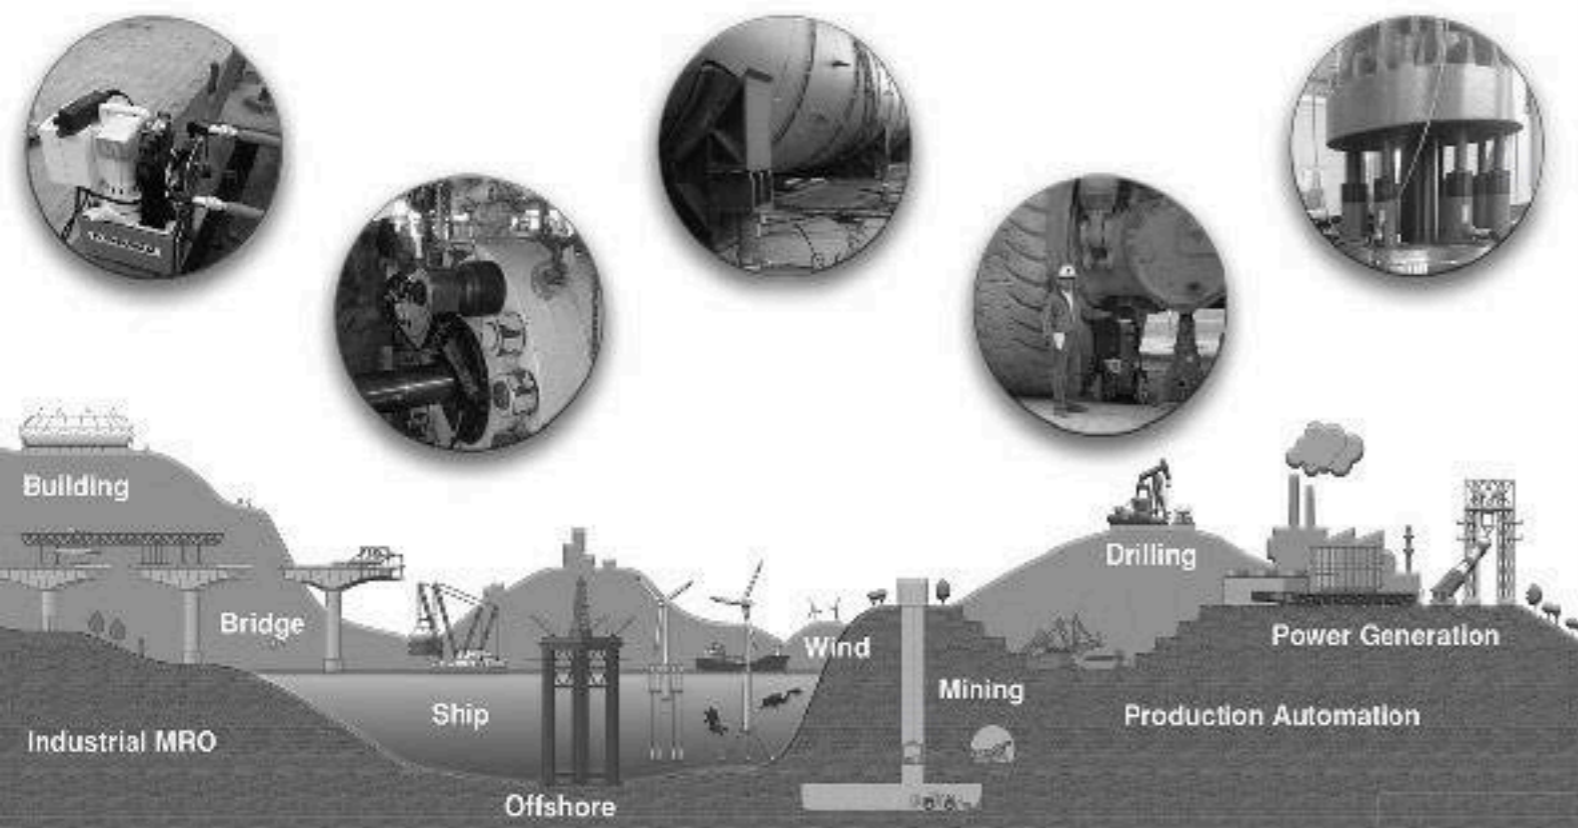

We stock a comprehensive range of parts and are sales partners and distributors for some of the most recognised and reputable manufacturers. This allows us to send many parts on an overnight delivery or same day courier, if required.

We can provide:

- o Hydraulic Valves
- o Hydraulic Pumps
- o Components
- o Hydraulic Filtration
- o Filtration Hire Equipment

PRODUCTS ENGINEERED FOR DEMANDING INDUSTRIAL APPLICATION

Top Speed Hydraulics is a company established in the Emirate of Sharjah, the activities of our company are in Trading, Servicing and Engineering Services of Hydraulic and Pneumatic components.

Representing renowned hydraulic companies and offering specialized services, repair and high capacity testing facilities.

We feel proud being the Sole Distributors of many well-known brands in Hydraulics.

Our Hydraulic Division eagerly awaits to assist you in the Hydraulic and Pneumatic application requirements

- Industrial & Mobile Hydraulics
- Pneumatics
- Linear Motion and Assembly Technologies
- Electric Drives and Controls

WE'RE HERE TO HELP GET YOU BACK UP AND GOING

PUMPS & MOTORS

From piston, vane and gear, we do it all

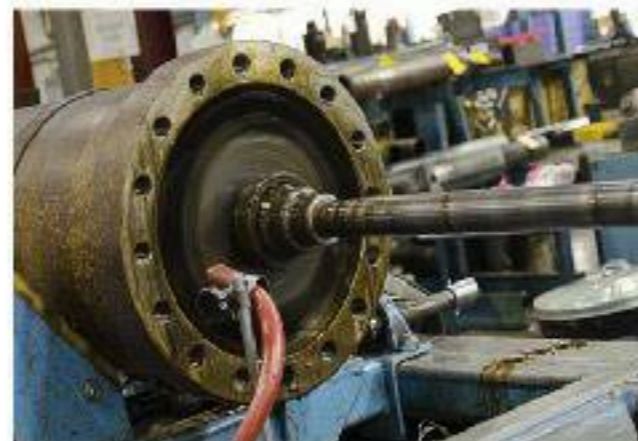

We provide expert hydraulic pump and motor repairs on Vickers®, Bosch®/Rexroth®, Kawasaki®, Hitachi®, Caterpillar®, Uchida®, Linde® Caterpillar®, Uchida®, Linde®, Komatsu®, Eaton®, Denison® & more. Covering from small to very large displacement size units - we can do them all. We also repair gearboxes, final drives, winch motors and other specialty hydraulic pump & motor units.

VALVES & SERVO/PROP VALVES

If it's a hydraulic valve, we can repair it

Our valve departments have the technical expertise and necessary equipment to repair hydraulic valves from manufacturers like Vickers®, Moog®, Schenck Pegasus®, Bosch®/Rexroth®, Oilgear®, Denison®, Atchley®, Atos®, HR Textron®, Hydrolux®, Parker® & more. We also repair main control valves found on mobile equipment from Kawasaki®, Kayaba®, Parker®, Rexroth®, Komatsu®, Commercial®.

CYLINDERS

From large to small cylinders, we've got you covered

Our hydraulic cylinder specialists have experience in repairing hydraulic cylinders. We have the ability to work on cylinders up to 40 feet long and 40 inches in bore, and we can repair all types including Chip Dump, Crane, Press, Telescopic, Shear, Excavator, Steering, Marine, Mining, Earthmoving, Tie-rod, Welded, etc. We also repair accumulators, intensifiers and swivels (rotary manifolds).

ELECTRONICS & SERVO MOTORS

Control cards, amplifiers & onboard electronics

All repairs on electronic components are also performed in-house like our other repair services, minimizing costs and downtime. Whether it's a control card, amplifier or onboard electronics, we can repair it. Furthermore, we provide expert servo motor repairs, which include calibrating feedback devices, checking for proper timing, shape, off-set angle & amplitude, on a variety of manufacturers.

Above application covers a wide range of products:-

- Accumulators, Ancillary Valves, Bell Housing and Drive Couplings.
- Cetop Valves and Accessories, Compression Fittings, Customer Specific.
- Directional Valves, Electrical, Filtration, Flanges and Port Connectors, Gearboxes.
- Hose Assemblies, Hydraulic Adaptors, Hydraulic Hose, Motors, Oil Coolers.
- Pumps, Quick Release Couplings, Reservoir/Tank, Reusable Fittings and Ferrules.
- Seals, Steering, Swage Fittings and Ferrules, Swivel Couplings.

Well-equipped workshop with standard tools and Test Benches.

Our experienced Service Team can handle almost all types of Overhauling & Testing of Hydraulic Pumps, Motors, Cylinders, Valves, Accumulators and Hydraulic Systems.

Apart from our in-house service, we have on-Site Services including up gradation, trouble shooting and repair of hydraulic system on a variety of applications like :-

- Mobile Equipment
- Industrial Equipment, Marine, Offshore & Dredging Machineries.
- Flushing of Hydraulic System and Contamination Monitoring.
- Performance testing and tune up service of Hydraulic Pumps & Motors on modern Test Rig.

Trust the above information is found useful and we now look forward towards an inception of fruitful business relationship between both our companies.

ON - SITE SERVICES

We can provide the following on-site services :-

Installation and commission of new hydraulic power units and systems designed and built in house

Fault finding

Modifications and repairs to existing hydraulic pump equipment

Oil and filter changes

ENGINE & PARTS DIVISION

Marine & Offshore Diesel Engine Repair, Overhaul & Reconditioning Specialists

The repair, Overhaul and reconditioning of marine diesel machinery is Top Speed Hydraulic main expertise. The supervising engineers we dispatch have a minimum of fifteen years' experience as responsible engineers on marine engines

All supervising engineers have equal experience and skill on 2 and 4 stroke diesel engines and are experienced with piston, diaphragm pump, circulating, screw and gear pumps. With fifteen years' experience with ship engine systems, the supervising engineers are also experienced in the service and repair of fuel systems, lubricating oil systems, cooling water systems, fresh water and sea water systems along with all ancillary equipment.T

HYDRAULIC SYSTEM DESIGN

Whether it's a small mini hydraulic power pack or a large complex hydraulic system we can deliver an effective solution. Adopting new technology, we can take your initial concept quickly through the design, build and test stages onto installation and commissioning.
